Environmental Science
Austin, Bevis, Karns, Rubino, Van Iten, Worcester, Worrell

Minor:
Env 201, Environmental Science Seminar (must first be taken in the freshman or sophomore year, may be taken up to three times); Env 401, Environmental Science Seminar (must be taken in the senior year). In consultation with an Environmental Science Minor faculty member, take at least five courses in the natural sciences; no more than two 16X courses from the natural science disciplines may be counted toward the minor. Total of 5.5 courses.

Students interested in the Environmental Science Minor who are majoring in a natural science discipline must focus coursework for the minor in a second natural science discipline. Students should consult with an Environmental Science Minor faculty member to devise an overall course of studies and activities that suits their interests, meets program requirements and prepares them for graduate study or professional opportunities.

Env 201. Environmental Science Seminar. An interdisciplinary seminar that will introduce students to the environmental sciences. Must first be taken by students in the freshman or sophomore year. May be taken up to three times. May also be taken by students not enrolled in the Environmental Science Minor. Pass/Fail only. 0.25 unit. Offered Winter Term only.

Env 401. Environmental Science Seminar. An interdisciplinary seminar that will serve as the culminating experience for seniors as they complete the Environmental Science Minor. Students will make a presentation of their work related to the Environmental Science Minor. Must be taken in the senior year. Pass/Fail only. 0.25 unit. Offered Winter Term only.
